

Ultrasonic **ANIMAL** Repeller

Motion activated animal deterrent

Thank you for choosing Whites' Ultrasonic Animal Repeller (UAR).

This repeller is designed to help you rid your premises of uninvited animal visitors such as dogs, cats and rodents safely and humanely.

Using sophisticated Passive Infrared (PIR) detection, the repeller detects movement and triggers short bursts of powerful ultrasonic sound waves.

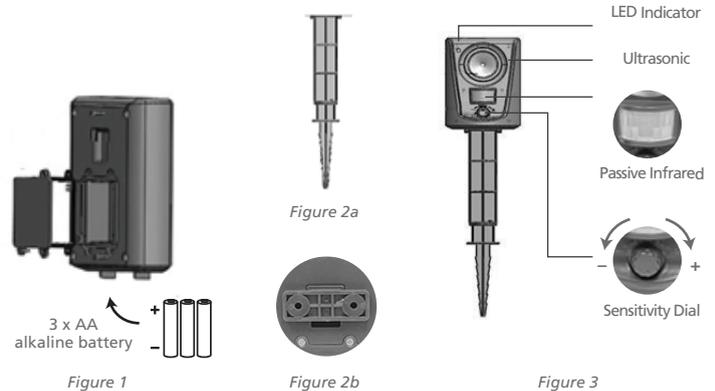

Assembly Instructions

To assemble and install

1. Open battery cover and insert 3 x AA batteries (Fig. 1)
2. Stake or mount into position
 - a. If staking, assemble 2pc stake and insert into base (Fig. 2a)
 - b. If hanging, fix bracket using appropriate screws and mount repeller (Fig. 2b)
3. Turn sensitivity dial to adjust coverage up to 8m / 45sqm

Notes

- The repeller is designed to be left ON continuously
- Do not immerse repeller into water
- Do not cover the PIR sensor

Warning

Always check underground utilities, cables or wires before digging or installing! Failure to check could result in personal injury, property damage or even death.

Repeller unit will be exposed to the elements so ensure unit does not immerse in water.
